

## **ContiTread™ Hybrid LD3**

The tread for light commercial vehicles.

**A new dimension in regional. The ContiTread Hybrid LD3 is ideal for transport on regional and urban roads or motorways with light commercial vehicles.**

Cold retreading performed by Continental – we combine innovative tyre production and retreading technologies so that the full cost-saving potential of cold retreading can be realised without compromising performance.

To ensure highest product and process quality, cold retreading with ContiTread is carried out by selected ContiTread partners.

Regional

Motorway

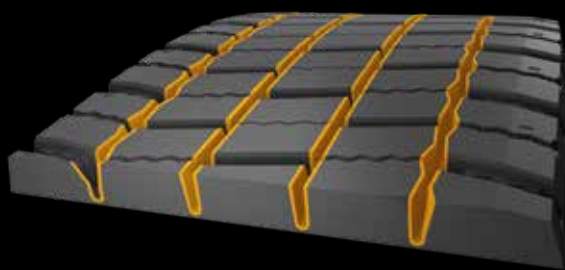

## Key benefits

- › **Improved rolling resistance**  
a two-layer tread construction and chamfered edges lead to a reduced deformation amplitude, resulting in improved rolling resistance
- › **Excellent mileage performance**  
thanks to Plus Volume Pattern
- › **Ideal for mixed applications**  
optimal for regional traffic, motorways and urban road conditions with light commercial vehicles

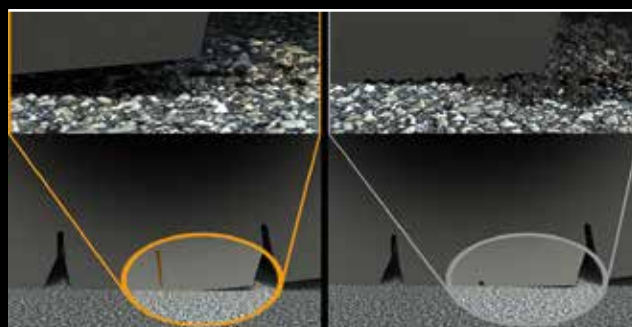

## Product highlights

### Plus Volume Pattern

Narrowed groove widths result in increased pattern volume which improves wear resistance to guarantee high mileage performance.

### Block design with 3D sipes

3D sipes strengthen the stability of the pattern blocks and optimise the ground contact area, leading to improved wear performance. At the same time, the high number of gripping edges improves the drive-axle traction.

| Tyre Size     | Width  | Tread Depth |
|---------------|--------|-------------|
| 205/75 R 17.5 | 190 mm | 15,5 mm     |
| 215/75 R 17.5 | 200 mm | 16,0 mm     |
| 225/75 R 17.5 | 200 mm | 16,0 mm     |
| 235/75 R 17.5 | 210 mm | 16,0 mm     |
| 245/70 R 17.5 | 210 mm | 16,0 mm     |
