

ContiTread™ Hybrid HT3 The performing trailer tread.

The tread for the popular Conti Hybrid tyre line: Ensures maximum economic efficiency for fleet operators, mile after mile after mile.

Cold retreading performed by Continental – we combine innovative tyre production and retreading technologies so that the full cost-saving potential of cold retreading can be realised without compromising performance.

To ensure highest product and process quality, cold retreading with ContiTread is carried out by selected ContiTread partners.

ContiTread™ Hybrid HT3

Regional

Motorway

M+S

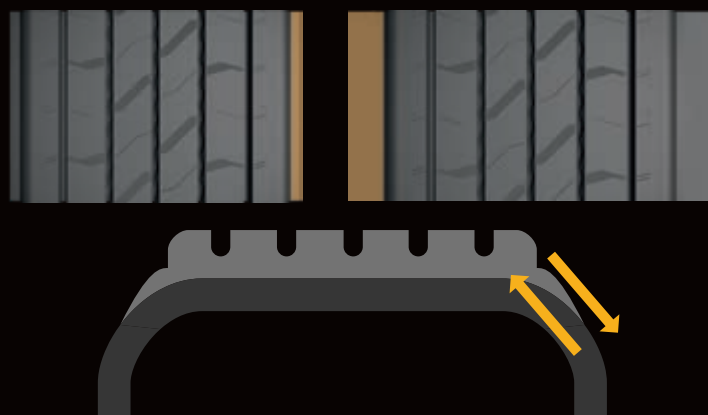

Key benefits

- › **Excellent fuel efficiency**
the tread polymer improves rolling resistance and increases the service life
- › **Outstanding mileage**
an enhanced pattern structure offers more mileage performance
- › **Optimised shoulder durability**
wing design with larger shoulder radius and improved groove increases durability in regional trailer application

Tyre Size	Tread Depth
435/50 R 19.5	13.0 mm
445/45 R 19.5	13.0 mm

Shoulder “wing” design for improved durability

The shoulder of the ContiTread Hybrid HT3 is designed to withstand the high shear stresses being generated at the shoulder in a regional trailer application. A larger shoulder radius and improved shoulder groove provide stability and increase durability.

Less heat development

The rubber compound of the ContiTread Hybrid HT3 is optimised to reduce heat development. This will ensure a longer service life for maximum economic efficiency.
